List of Suppliers

Here you find the right manufacturer of laser beam sources, components, laser machines and equipment for you. On the Industry Arena, you will find the list of the suppliers for the following applications.

Applications

- Cutting
- Welding
- Hardening
- Cleaning
- Heat treatment
- Coating
- Drilling
- Label
- Engraving
- Soldering
- Plastics processing
- Surface texturing
- Additive manufacturing
- Subtractive manufacturing
- Glass processing
- Other applications

VDMA Laser and Laser Systems for Material Processing

VDMA Laser and Laser Systems for Material Processing is a platform for exchange, communication, and cooperation. It involves all important stakeholders, from the manufacturers of components directly related to the end application, laser manufacturers and system integrators as well as research institutes and universities. With our activities we build a strong network, promote the laser community in the area of material processing, and raise public awareness.

Members are

- manufacturers of components directly related to the end application
- laser manufacturers and system integrators
- research institutes and universities

What we offer and what are the advantages of membership?
